With a length of over 6071m, the **Grindelwald-Männlichen** Gondola Cableway is the worlds longest aerial gondola. **Jungfrauoch** railway station, which at an elevation of 3454 meters is the highest railway station in Europe. The **Jungfrauoch** is often called the "**Top of Europe**".

Therefore we ask the participants who join us for this excursion to contribute **50SFr** (to be paid in cash at the Workshop registration desk).

We have to know in advance how many people will participate in this excursion. If you did not register yet but wish to participate, please do it not later than **Monday, September 6** at our secretariat. Also be aware that the number of places for the organized excursion at the reduced price is limited!

If you are going to participate please take with you **proper shoes and clothes**. Temperature at 2000m could be around **+10C**, at 3400m it will be very likely **below 0C** (certainly in the Ice Palace). If somebody does not want to hike from **Männlichen to Kleine Scheidegg** there is a possibility to take a train from **Grindelwald to Kleine Scheidegg** and wait for the main group there (nice hiking area, shops, bars and restaurants). There will be no lunch at the Hotel therefore a lunch box will be given out to everyone before the excursion.
